Key Highlights of UPCAT

✓ What is Career Counselling?

In current times, career counselling is a need as most students pick commonly known domains as their career option. Career counselling is an effort for students' career guidance right from their school about the available career options as per their interest and stream of academics.

Through career counselling, an analysis can be done for students which will help them find out their interests and also their strengths and weaknesses.

✓ Why is career counselling important for high school students?

Career counselling should be done in the school itself for class 9-11 students specifically because these are the levels where students choose a particular stream as their specialisation and also, it will be helpful for them to decide the stream they should opt for. This is because many students are not satisfied with the stream they choose and tend to change it; this happens in absence of proper guidance about options available as per their interest and different education stream.

✓ With career counselling, students would be able to know –

- Their aptitude and interests
- Strengths and weaknesses of a particular interest
- Making choice of stream for education after class 10
- Career options available in market as per their academic choice
- Career options available as per their interest
- Some alternate career options if they decide to change their stream in future

UPCAT is an innovative tool designed by our team of highly experienced Psychologist, Career Counsellors, Educationalist & Recruitment Specialist (India & US) for the welfare of the students from Class 9th -12th (School Level) and Undergrads /Master students (College Level).

1. **Personality Assessment of each student with 100% accurate results.**
2. **Top 50 Jobs Shortlisted out of 300 Job Details Available for each Personality Type.**
3. **Time Saving Tool for Schools amidst busy school schedule (Only 20Minutes Computer Based Test).**
